

THE
BUSINESS OF
RURAL
CONNECTIVITY

20% PEOPLE
ARE STILL OFFLINE
AND UNCONNECTED,
GLOBALLY.

If connected, these 1.5 billion people could find jobs, pursue global businesses, and add huge value to the global economy.

If connected, these 1.5 billion people could be your customers.

RURAL NEEDN'T MEAN BACKWARD

Across the globe, telecommunications industry is witnessing transformational changes. Networks are becoming more sophisticated, reliable, resilient and scalable.

Omoco is the network-in-a-box technology: a sensible connectivity solution for rural communities with small populations.

EXTENDING COVERAGE TO RURAL

Fierce competition and technological developments in telecom industry is driving players to deploy flexible, innovative and affordable solutions. Such technology makes mobile services in rural and remote communities a viable business proposition, creating newer business opportunities and fueling the industry's growth.

In the face of such technological advancement, is your business ready for the rural?

BECOME AN ENTREPRENEUR

From starting a small business to becoming a partner, Omoco makes telecom entrepreneur-ing an easy feat. Set your own prices and sell telecom services the way you think is right for your community.

The investment is risk-free, the business - scalable, the ROIs - fast.

WHAT IS OMOCO

It's a simple, set-it-up-yourself, GSM solution for geographies that are deprived of mobile networks. It's smart, it's all-inclusive of voice and data, and runs on minimal power- all designed to empower rural and remote communities, globally.
